**DETAILED ACTION**

***Election/Restrictions***

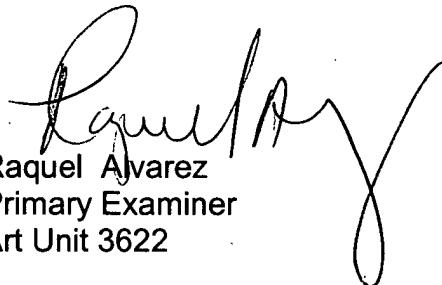

1. Restriction to one of the following inventions is required under 35 U.S.C. 121:
  - I. Claims 8-16, drawn to a terminal for entering unique customer identification codes from a customer identification presented at the point-of-sale transaction , classified in class 705, subclass 26.
  - II. Claims 17-76, drawn to associating a customer with a dollar amount, classified in class 705, subclass 26.
2. The inventions are distinct, each from the other because of the following reasons:  
Inventions I and II are related as subcombinations disclosed as usable together in a single combination. The subcombinations are distinct from each other if they are shown to be separately usable. In the instant case, invention II has separate utility such as associating a customer with a dollar amount. See MPEP § 806.05(d).
3. Because these inventions are distinct for the reasons given above and have acquired a separate status in the art because of their recognized divergent subject matter, restriction for examination purposes as indicated is proper.
4. A telephone call was made to Richard Neifeld on 5/13/2005, but an election wasn't made over the telephone.
